# Freelance Digital Product Designer

## about

---

What I love most is shaping intangible ideas and making them real. The most satisfying feeling is seeing my customers smile at the possibilities and solutions we can create together. My experience lies in helping startups and new products grow from zero to MVP to full-scale products. I've helped companies set their roots in the business world or refine what was already there.

I'm passionate about both Italian and Scandinavian design, as both cultures have played a big part in my life. I'm a motivated, curious, and creative person with great attention to detail and user experience.

## experience

---
